I wasn't there so don't know what she committed to other than talk to Navy.

No problem about Kyle.

I was wondering if Karen and Paul ever made that call to Maureen. Did Maureen commit to getting back to us?

Sorry about Kyle. I asked my guys to contact him yesterday. It fell off the table for me. Been out on travel and buying a house.

Paul and I were at a meeting with Maureen Sullivan yesterday. Paul talked to her about Hartsville. She is going to discuss with Richard Mach. I think we will be discussing this next week.

Ok. I mentioned it to Karen yesterday and she seemed unaware of the briefing. I'll dig further.

Kyle Seckinger sent me another email this morning, so I just called him to answer his questions rather than make him wait any longer. He just wanted to know what the results meant and what, if anything, the townships could do to help move along the effort to get these homes hooked up.

Joan and Karen are on the invite. Don't know why you're not on it but I think you should go.

Steve,

Is the Aug 8th RA briefing truly an “all things PFAS related” or is it only CERCLA related PFAS?

Rick,

I didn't see you on the distribution list – thought you may want to take a look at the summaries of PFAS sites for the RA briefing. I didn't see anything on the Chemours Washington Works site. Do

you think it should be included in write-ups?

Roger

Subject: July PFAS Summary Update -
Please Read

Greetings all,

Steve Hirsh will be providing the RA with a bi-monthly briefing of all things PFAS related beginning next week (Thursday August 8, 2019). He will be using the monthly PFAS site summary narratives as one of his sources of information and has asked for the most current version by mid-day, August 7th. Last month I was asked to coordinate the monthly collection of site narrative updates and other notable events related to PFAS going on in the pre-remedial, remedial, drinking water, and human health worlds. Moving forward it appears as though I will need summary updates every two-weeks, instead of monthly.

Please use the link below for the July 2019 update and review the current site narratives, revise/update accordingly, and add any new information that you can (distribute this message to

appropriate staff as needed). The current summary is not all-inclusive and was quickly put together for the DD last month at his request. Regular narrative summaries have not been collected for about 6 months or more. Most of you are familiar with the type content provided in the past but essentially we are looking to include a brief background of current/ongoing PFAS investigations and recent accomplishments in those investigations, including a description of collaborative efforts between EPA and partner agencies. The link directs to the June update narratives so that you may see what was included last month that may need revising for July. If there are any other non-site specific events that you are aware of that are PFAS related, please include it here.

If you have any questions, feel free to ask. Thank you for your time in helping to maintain a current summary of PFAS-related activity in the Region.
